

Soojin Park

EXPERIENCE

Mediclo - Web Developer

Los Angeles, CA • 01/2023 - Current

- Developed web applications using HTML, CSS, JavaScript, jQuery, and Liquid for Shopify.
- Created a custom bundling functionality to enhance the customer shopping experience, enabling customers to easily select and purchase product combinations.
- Overcame Shopify's 100-variant limit by implementing custom code, allowing for expanded product options on the website.

Beta Boulders - Full Stack Developer

Los Angeles, CA • 06/2022 - 12/2022

- Converted jQuery frontend application to React.js.
- Developed and tested Gym Account Features including Gym Portal, Print Beta Tags, and Route Management.
- Troubleshoot and debugged general production issues.

Hewlett Packard Enterprise - Junior Accountant

Seoul, South Korea • 02/2020 - 07/2021

- Created a finance and operating leases tracking report using Excel.
- Processed payments and documents, such as invoices, employee reimbursements, and financial statements.

PROJECTS

- **E-commerce Site** - <https://mediclo.com>

Enhanced website usability and improved the overall shopping experience by adding custom code and integrating APIs, resulting in a more user-friendly online store.

- **Simple Jobs** - <https://simplejobs.netlify.app>

Developed a part-time job application platform that allows users to search for workplaces currently hiring nearby. The platform also enables employers to find and hire suitable candidates.

- **Amazing Breweries** - <https://breweries-app-ab262.web.app>

Created an interactive application showcasing the top 8 breweries in Los Angeles. Features include leaving 5-star reviews, searching different beer types, and finding food pairings for each beer.
